

PORTABLE SAW FOR TUBE CUTTING

MACHINING FUNCTIONS

Tube cutting in restricted areas.

PERFORMANCE

Cutting time : 3 minutes on a 88 mm tube.
Diameter : 11 mm.
Good quality finish.
Narrow width of cutting blade : around 1 mm
Cut perpendicular to the axis of the tube.
No vibration and no chip projection for the operator.

CAPACITY

All tubes from 30 to 90 mm O.D.
Wall thickness up to 11 mm.

FEED

Automatic feed via torsion spring for a constant cutting force.

DRIVE

Electric drive : 220 V – 1 HP
Adjustable cutting speed from 60 to 80 m/mn

CLAMPING

Manual O.D. clamping.

WEIGHT : 12 kg

SET-UP

Set-up in 10 seconds.

TOOLING

Various blades according to the tube material.

OPTIONAL

Possibility to cut tubes from 0° to 30° angles to tube axis.
Pneumatic drive.
