

Elbow mandrel assembly for PROTEM machines type US25, US40, US80 and US150

This new generation of elbow mandrel assembly allows the positioning of a US-type machine on all types of elbows. Its concentric adjustment is due to the rules located around the system, this leads to a high quality weld preparation on all types of elbows and materials including stainless steel and other high nickel alloys.

Technical Features:

Machining capacity

	ID	OD
US 25	38	120
US 40	145	219
US 80	170	358
US 150	261	508

Dimensions

	A	B	C
US 25	---	38 / 61 / 87,5	42 / 42 / 42
US 40	58,98	139	100
US 80	85,44	166	140
US 150	177,86	253	140

Comment:

The clamping system for the US25 contains three clamping heads which are used in connection with additional parts for the shaft of the US25.
